**Subject:** Clam Island Management Resources

Dear Sirs,

I heartily OPPOSE the closure of Tomales Bay around Clam Island and Seal Island for clams and crabs and fish. This is about the only area that small boaters can get to easily and feel comfortable taking young families out to. PLEASE DO NOT close this area, I beg of you! The clams are not in danger in Tomales Bay. The seals are more plentiful than they have ever been and face no danger from clammers and crabbers and boaters. The fish have not been depleted in this area. I believe you mean to do the right thing for the resources, this is definitely NOT the right thing!
